

ULTRAVIOLET GERMICIDAL IRRADIATION (UVGI)

Model: UVGI LEO 55
 Lightwave: UV-C primarily in the 253.7nm wavelength
 Bulb lifespan: 8,000 operational hours
 Ballast lifespan: 20,000 operational hours
 Power of bulb: 100 watts*6pcs
 Rated power: 600 watts
 Product height: 150cm
 Net weight: 15kgs

1200W High Power

Designed for indoor use

One unit per room can prevent you from virus or bacteria.

UV Disinfection

UV

CK600 can produce UVC which enable it to kill 99.9% of microbes within a very short time.

Motion Sensor

Protect you from UV hazard

Once the sensor detects people's presence, it will shut the machine down. After people leaves, the machine will power on automatically after 20s.

Remote Control

Safe and convenient

The remote control comes with a timer which can be set at 15 min, 30min or 60 min.

Long Life Time

9000 Hours

A one-time investment in UV light disinfection technology can save you time and money for years.

Mobile Design

Easy to use

The modular system is freely movable to adapt to various spaces.

The best way to mitigate against airborne viruses, yeast, fungi, bacteria and mold

UVGI LEO 55
